PROFESSIONAL SUMMARY

Senior Frontend Developer with 5+ years of experience building responsive, accessible, and scalable web applications. Skilled in React, Next.js, TypeScript, and performance optimization. Proven ability to lead engineering teams, architect frontend systems, and deliver user-centric features in fast-paced environments. Known for implementing accessibility standards, improving load times, and creating reusable design systems that accelerate development velocity.

EXPERIENCE

Lightforth

January 2025 – Present

Dallax Texas (Remote)

Frontend Lead

- Led the frontend team responsible for building scalable user interfaces powering Lightforth's job-seeking and interview-prep platform.
- Built a reusable component library with React + TypeScript, increasing UI consistency and reducing development overhead
- Implemented advanced performance optimizations (code-splitting, caching strategies) resulting in a 40% reduction in initial load time
- Collaborated across product, backend, and design teams to deliver new features with exceptional UX and accessibility compliance (WCAG)
- Mentored junior developers and enforced engineering best practices across code review, testing, and release workflows

Lightforth

June 2024 – December 2024

Dallas Texas (Remote)

Founding Frontend Engineer

- Joined as the first frontend engineer to architect Lightforth's initial web platform and engineering workflows.
- Designed the initial React/Next.js architecture powering the product's launch and early user growth
- Built core user-facing features and responsive UI flows in collaboration with product and design
- Integrated backend APIs and state management (Redux) for real-time data handling and smooth user interactions
- Set up CI/CD, Git workflows, and Docker-based development pipelines to reduce deployment friction and integration errors

Solace Imaging

January 2024 – Present

Calgary, AB (Remote)

Frontend Developer

- Contributed to frontend performance and UX improvements for a medical imaging platform.
- Implemented lazy loading, image optimization, and code splitting for improved load times
- Built efficient data exchange workflows using REST APIs for seamless frontend-backend integration
- Participated in design reviews and translated UX recommendations into polished, production-ready interfaces
- Facilitated cross-functional team meetings to ensure alignment and unblock engineering challenges

Carbon Businesses (Vella Finance)

Delaware, US (Remote)

Frontend Developer

- Implemented core fintech features across savings products and data visualization dashboards.
- Integrated backend APIs to power Flex Savings, Fixed Savings, and Target Savings products
- Built interactive dashboards using D3.js and Chart.js for advanced financial analytics
- Ran usability tests and iterated on dashboard UI/UX to improve comprehension and reduce user friction
- Audited and updated components to meet WCAG accessibility standards

MaiTech Studios

Lekki, NG

Frontend Developer

- Worked within a cross-functional team to architect and deliver a full-scale e-commerce platform.
- Built responsive layouts using flexible grid systems and CSS architecture best practices
- Implemented Redux middleware and selectors for advanced async workflows (data fetching, form submission)
- Integrated REST APIs using Prisma ORM for seamless data operations
- Delivered features that improved user experience across devices and screen sizes

Odigital Agency

Surulere, NG

Frontend Lead (Promoted from Intern)

- Oversaw multiple frontend projects and mentored junior developers.
- Designed a modern, efficient logistics interface for Agofure, improving customer satisfaction by 25%
- Reduced overall bug count by 20% through improved QA and testing workflows
- Revamped the agency website with improved layouts, accessibility, and performance metrics

EDUCATION

University of Ibadan

Field: Computer Science, Minor in Mathematics

Bachelor of Science

2024

Harvard University (CS50)

Field: Introduction to Computer Science

Certificate

2022

PROJECTS

Paje — Minimal Reactive JavaScript Framework

2024 – 2024

- Created a lightweight (
- 6.2KB) reactive frontend framework with a custom virtual DOM, reducer-based state management, and automatic UI updates. Built to simplify the architecture behind modern UI libraries and enable developers to learn framework internals in a clean, readable codebase.

Technologies: JavaScript (ES Modules), Virtual DOM, Reactive State, Reducers, Custom Renderer

- Developed the full frontend console for a reactive Web3 backend platform. Built contract upload flows, real-time event monitoring, trigger execution logs, and database inspectors using a combination of WebSockets, custom hooks, and TypeScript-powered SDK integrations.

Technologies: React, TypeScript, WebSockets, Clerk Auth, Triggr SDK, JSON Inspectors

SKILLS

Golang	Python
C/C++	SQL (Postgres)
JavaScript	TypeScript
React.js	Next.js
Node.js	TailwindCSS
Material-UI	Redux
Redux Toolkit	Cypress
Docker	Git
Travis CI	Google Cloud Platform
VS Code
